

Viscous Filling Machine

Filling Range: 50 ml to 5 Liters / 250 ml to 15 Ltr / 500ml to 25 Ltr (No Need of Change Parts)
Output: 16 to 20 bottles per minute for 1 Liter. (Depending upon Liquid and Bottle)

Applicable Industry:

Pharmaceutical, Ayurvedic, Nutraceuticals, Cosmetic Lubricant Oil, Edible Oil, Ghee, Dairy Products, Chemical, Cleaning Material, Agrochemical, Pesticides, Food and Beverages, Dairy, Juice and relevant

Suitable for Different Types of Material like Milk, Syrup, Juice, Honey, Sauce, Cleaning Products, Phenyl, Shampoo, Handwash, Glycerin, Solvent, Chemical, Lotion and relevant

Description:

The semi-automatic electronic liquid filling machine is double head compact and highly efficient machine with elegant look. This multi-function multi featured machine meets the custom requirements of filling liquid and viscous material in glass, plastic and aluminum bottles.

Operation:

Bottles have to place manually below the filling nozzles at tray of machine. The filling range can be set from keypad directly. By giving start command the liquid dispenses from the nozzle. Once the set volume of liquid has been dispensed, the nozzle shuts off immediately in positive way and ensures zero dripping.

Features:

- Unique table top machine suitable for small output
- Low Power Consumption
- Compact and versatile unit S.S. matt finished body
- Suitable for different shape and size containers
- Easy and accurate adjustments of fill desired quantity without the help of change parts
- Operation timing can be set as per user efficiency
- Reciprocating Filling Nozzle with self-centering device to avoid Foaming.
