

Pharmaceutical Oral Liquid Horizontal Form Fill Seal Machine ZS-240

Scope of application:

Pharmaceutical industry: oral liquid, health care products, physiological saline, lotion, cough syrup, chinese medicine oral liquid etc.

Chemical industry: perfumes, car perfumes, human milk, shower gels, shampoos, essential oils, detergents, hand soaps, inks, etc

Pesticide industry: foliar fericlizer, plant growth regulator, herbicide, emulsifiable concentrate, rodenticide, and other chemical products

Food industry: linseed oil, castor oil, olive oil, enzymes, honey, dendrobium and so on.

Main performance structure features:

- Imported electrical components are used on the basis of the original 240 type and the machine operation accuracy is higher and more stable
- With a rocker-style operator interface, it is easy to operate from anywhere in the machine
- HC high speed high precision high speed moth in controller, steeples frequency control. The servo motor control film unit is more precise
- The man-machine interface makes operation easier
- Automatic unwinding one film slitting. There is a photoelectric pattern pair function. The products are eqquisite and meet the high standard packaging requirements.
- The electronic peristaltic pump device is used for accurate filling and adjustment, and is suitable for filling products with various viscosities.
- High filling accuracy, no dropping, no foam, no spillage, no drawing
- The parts in contact with the medication are made of high quality stainless steel. GMP compliant.
- More choice in bottle style, the bottom can be chosen to be flat and can stand up.

Technical Parameter:

Max. forming depth	24mm
Filling speed	100bottles/min
Number of filling heads	5filling heads filling at the same time
Packaging Materials	PVC/PE PET/PE (0.2-0.5)*240mm
Filling capacity	1-100ml/pc
Total power	8.5KWS
Voltage	220V three phase/60HZ (380V three phase/50HZ)
Weight	1200KGS
Dimensions	3200*850*2000MM
