

Automatic Capsule Filling Machine NJP-400

Pharmaceutical, medicine, and chemicals (powder, Pellet, granule, pill), ect.

Features:

1. Touch Screen with PLC
2. Capsule vacuum mechanism located to ensure the capsule 99% pass rate.
3. Removable hoppers easy for cleaning and auger feeders easy to adjust the filling dosage.
4. Speed selection and adjustable length for closed capsule.
5. CE electrical appliance control system.
6. Change parts are all fast assembling, easy to move the rotary table and ring carrier.
7. Full enclosed dosing stations and rotating table for the whole capsule filling plants.
8. Large cam mechanism keeps the rotating table of mould together with the whole equipment running with balance, and completely guarantee the machine operation with highest precision.

Technical Parameters:

Model No.	NJP-400
Capacity	400 capsules/min
No. of Dose	3
Suitable for Capsule	00#, 0#, 1#, 2#, 3#, 4#
Total Power	3Kw
Overall Weight	700Kg
Machine Dimension	730mm (L) x 950mm(W) x 1700mm(H)
Accuracy	1% (Depending upon the consistency, uniformity & bulk density of powder under the controlled level of humidity)
