

## Z Type Bucket Elevator Food Grade Conveyor | VTOPS-F-Z

Z type bucket elevator is an auxiliary machine of packaging machines. The Z bucket elevator can supply good solutions not only for single discharge but also for multi-discharge. Mainly used to convey the materials of solid and granular. Such as rice, candy, potato chips, cookies, peanuts, american almonds, pistachio, popcorn, animal feed, and etc.

### Features:

1. The conveying speed is adjustable, it is available to realize uniform feeding.
2. Zero crushing in conveying process.
3. Full-closed structure, no pollution.
4. The lifting height is available to customized according to per order.
5. Single discharge outlet, but also for muti-discharge outlet(s).
6. Material of structure: Stainless steel 304 or carbon steel.
7. The buckets are made of a food grade reinforced polypropylene, which can tolerate the high and low temperature.
8. Include vibrating feeder is especially for Z type bucket elevator.
9. Smooth operation and easy to operate. Easy to install and maintain.

### Parameters:

Model	VTOPS-F-Z
Bucket Volume	1.5 L (Customizable)
Bucket Material	Food Grade PP
Number of Outlet(s)	Single or Muti-discharge port
Body Material	Stainless Steel
Lifting Height	As Per Order
Conveying Speed	2-5 m <sup>3</sup> /h
Voltage	AC Single-Phase 220V
Power	0.75 Kw
