

Self-Adhesive Label Applicator TNZ-120

This automatic self-adhesive labeling machine is typically designed for labeling of round bottles and cylindrical containers, which is widely used in various industries, such as foodstuff, cosmetic, pharmaceutical, pesticide and more.

This self-adhesive label applicator is economical and easy to use. It has HMI touch screen and PLC system for easy operating. The built-in microchip allows a fast and easy operation of adjustment and changeover.

This labeling machine is applicable to implement single or double sided labeling for bottles whose capacity below 1L.

Technical Parameters:

Model	TNZ-120
Speed	50-100 Bottles Per Minute
Labeling Speed	Less Than 5000bph
Label Width	20-130mm Label Length 10-220mm
Transport Package	Wooden Packing Suitable for Exporting
Electrical Requirements	Power:1100W, Voltage: 220V, Frequency: 50-60Hz (Op
Labeling Precision	+/-1mm
Specification	2200mm*1500mm*1550 mm
