

## *DTJ-C Semi Automatic Capsule Filler*

DTJ-C Semi Automatic Capsule Filler DTJ-C for filling various types of capsules, It is an ideal equipment with smartness accuracy for dosage, novel structure, good-looking, ease of operation, for filling capsule...

### **Description:**

1. Easy to operate and stable operation.
2. The machine is equipped with capsule sowing protection device and emergency stop device to ensure the safety of the operator.
3. The full automatic structure is adopted to improve the efficiency of equipment and the friction caused by the artificial sowing process.
4. The mold chamfering position is accurate, ensure the sowing capsule is not lock of grain.
5. The position of the lock pocket is put in a flat way, which is locked by using the cylinder starting principle, which greatly reduces labor intensity, saves manpower resources, and reduces the leakage of the powder in the process of locking, improving the utilization efficiency and quality of the raw materials.
6. The machine sowing, filling and locking three working stations are set independently. It adopts electronic mechanical integration control, pneumatic joint control and variable frequency stepless speed regulation device, which facilitates the organic connection of all working procedure and improves filling speed.

**Technical parameters:**

<b>Model</b>	<b>DTJ-C</b>
Max.Capacity	30000 pcs/h
Applicable capsule	00#、0#、1#、2#、3#、4#、5#
Power supply	2.12kw
Power	380V/50Hz
Outline dim.	1300*800*1750mm
Net weight of machine	400kg
Gross weight of machine	500 kg
Packing size	1640*720*1700mm
