

Oral Liquid Filling and Sealing Machine

As the main device of the oral liquid production line, this oral liquid filling and sealing machine is specially designed for filling, capping, and sealing 5-30ml vertical bottles with easy open lids or aluminum-plastic lids.

This equipment should adopt box packaging and container transport.

Features:

1. Reliable screw bottle feeding mode is designed.
2. Partial following bottle filling method to prevent bubbles.
3. Electromagnetic vibration capping mode to improve capping efficiency.
4. This oral liquid filling and sealing machine is the combination of filling and sealing.
5. Simple structure, stable performance, and easy operation with one-button control.
6. Easy to maintain with many detachable components.

Main Parameters:

Bottle Size	5ml~30ml
Production Capacity	4800~6000 bottle/hour
Rate of Sealing	≥99%
Power	1.3KW
Electric Supply	380V/50hz, 3phase
