

Two Dimensional Mixer EYH-series

The mixer are widely used in pharmaceutical, food, dye, feed, chemical fertilizer and pesticide industries and especially suitable for mixing various solid materials with large volume (1000 to 12000 litres).

The mixing barrel swings while rotates so that the materials in the barrel can be fully mixed. Because the discharge port of the barrel is out of the barrel rotating, the mixer features quick mixing and discharging, as well as high volume mixing capacity.

Specification:

Model	Barrel Volume(L)	Loading capacity (L)	Max loading weight (kg)	No.of swing rotation	Total motor power (kw)	Overall dimensions(mm)	Total weight (kg)	Barrel weight (kg)
