

DTJ-C Semi-automatic Capsule Filling Machine

Semi-automatic capsule filling machines are suitable for all kinds of national standard 0 # 1 # 2 # 3 or imported capsules. The electrical, pneumatic combination control, equipped with an electronic automatic counting device, can automatically complete capsule placement, separation, filling, and locking, reducing labor intensity, improving production efficiency, and ensuring the production process complies with GMP requirements. This machine has the advantages of sensitive and reliable action, accurate filling dosage, novel structure, beautiful shape, and convenient operation, making it the ideal equipment for filling capsule drugs in the pharmaceutical industry.

Technical Parameters:

Production capacity	1.25Ten thousand pills per hour
Apply the capsule	0/1/2/3No. Domestic or imported capsules
Filling dose	Potions/small particles
Power is	2.2KW
Overall dimensions	140×950×1480mm
The weight	300KG
Accessory equipment	One vacuum pump
