

## *Automatic Small Essential Oil Glass Bottle Filling Capping Machine SGGX-I/II*

This machine is the main machine of filling and capping in liquid production line, mainly used for filling, capping and capping of glass bottles or plastic bottles.

Using straight line or disc positioning filling, electromagnetic vibration cap feeding, automatic rotation (rolling) cap, with no bottle no filling function.

The machine combines filling and rotating (rolling) cap into one, filling volume precision, advanced design, compact structure, completely in line with GMP standards.

### **Features:**

- All electrical components adopt well-known brands.
- The machine is easy to operate, no bottle no filling, accurate measurement.
- Automatic screw (roll) cover, ensure the sealing firm, beautiful.
- Made in full accordance with GMP standards.

**Technical Parameters:**

<b>Model</b>	<b>SGGX-I/II</b>
Applicable Specifications	2-30ml
Production Capacity	30-40 60-80
Filling Accuracy	≤±1%
Voltage	380V/50Hz
Cap Cover Rate	≥99%
Air supply	1.5M <sup>3</sup> /H 0.4-0.7Mpa
Power	1.5 kw
Weight	500 kg
Package Size	1800*1500*1600mm
