

XHL-LP200 High Speed Bottle Unscrambler

This machine is suitable for round bottles, flat bottles, and automatic feed bottles. It feeds bottles to a sorting plate via an elevator hopper, then the bottles are unscrambled upright onto the conveyor. This process greatly reduces labor intensity.

Features

- The equipment consists of an arranging machine and a cap-sender. Instead of hand working, it saves labor.
- Advanced design, compact structure, small lying area.
- High effectiveness of bottle arranging, easily adjusting applied various bottle sizes.
- Frequency conversion control, auto-control in a combined line.
- The whole machine meets the requirements of GMP.

Technical Parameters:

Bottle used:	10-200ml various kinds of plastic bottle
Qualified orienting:	≥99%
Power consumption:	1kw
Single machine noise:	<60dB
Orienting speed:	3000-7000BPH
Power supply:	220V 50Hz
Speed control:	Frequency inverter adjustable
Net weight:	500kg
