

## *Semi Auto Screw Linear Capping Machines*

The machine adopts the integrated design of machine, electricity and gas, the structure is compact and reasonable, and the operation and maintenance are convenient. Stable and reliable performance.

Widely used in food and beverage, condiments, health care products and other industries in a variety of three (four) swivel glass bottle of vacuum spin cap.

### **Technical parameters:**

- Power supply: AC220v/50hz
- Power:  $\leq 100\text{w}$
- Production speed: 800-1200 bottles/hour
- Applicable bottle cap: 25-45 mm 45-70mm
- Applicable bottle height: 50-150mm
- Diameter of bottle body: 30-80 mm
- Gas consumption: 0.5m<sup>3</sup>/0.8mpa
- Gas source pressure: 0.8MPa
