

CD-1680 Impulse Blister Sealing Packing Machine

The Automatic Impulse Blister Sealing Packing Machine is used for double blisters packaging, blister to card packaging, card to card packaging. Because the product is so visible, the packaging is so popular with manufactures and consumers.

Our company manufacture the Full auto double blister high frequency packing machine, it comprise by 2 set of blister forming machine and 1 set of rotating disk impulse or high frequency heat sealing machine. In the meantime it finished the double blister's forming cutting, the mechanical hand put the blister into the heat sealing station of the high frequency machine. This machine can save lot of labor and work, improve production efficiency.

Suitable for:

Stationery, electronics, toothbrush, batteries, toys, gifts, hardware, tools with plastic-plastic or plastic-card packaging.

Technical Parameter:

Model	CD-1680
Packing Material	PVC/PET Roll Thickness(0.18-0.40) ×Width360mm
	Cardboard (200-700)g
	Pressure (0.55-0.8)Mpa
Air supply	Air consumption 7.5m ³ /min
Power	20Kw 380V 50Hz 3Phase 5Wire
High frequency machine power	15Kw
Mould cooling	Tap water or Chiller Consumption 18L/h
Production capacity	15 Strokes/Min.
Forming area	340×220×50mm
Sealing area	320×220×50mm
Stroke range	30-220mm
Overall dimension(L×W×H)	6000 x 2100 x1800 Mm
Weight	Appr.3500Kg
