

GHK-005 Multi Colors Liquid State Powder Forming Machine

The equipment especially designs for producing multicolor liquid state powder.

Application:

The equipment especially designs for producing multicolor liquid state powder. The surface of the finished product is non-pollution. It can make different patterns of product according to customer requirement.

Features:

- Human-machine interface operation panel with easy operation. Mould quick release mechanism design, easy color changing and cleaning.
- Can fill many type shapes and embossment patterns.
- Filling times can fill many times according to requirements.

●The quantity of aluminum pan is different according to different size. The max diameter is 65*65(mm) for single pan. And the feeding way is automatic.

PROCESS

Feed aluminum pan manually- Push mould-Fill to forming automatically-Push mould to final compacting station-Finished product out.

Technical parameters:

Model	GHK-005
Size	210x135x4750px
Voltage	AC220V,1P,50/60HZ
Air Pressure	4-7kg/cm ²
Output	6-12pcs/min (actual output acc. to different patterns)
The max press powder range	Dia.65mm
Color Changes Time	about 90mins
Operator	1 Person
Mould	17groups
