

## XT-300 Type Adjustable Cellophane Overwrapping Machine

This machine is suitable for overwrapping different specifications of cartons, boxes with cellophane or BOPP film, which is designed innovatively on the basis of introducing and absorbing the concentrated products advanced technology at home and abroad. The main body of the machine is a mechanical united structure. It introduces a stepless frequency speed controller, automatic control, and electrical accessory equipment. On the combination of machine, electricity, and pneumatic parts, it has the features of stable and reliable operation, firm sealing, and smooth surface and beautiful appearance. It can do packing automatically, heat sealing, counting, and automatically sticking tear tape to single or multiple cases. The machine has stepless packing speed adjustment, no film feeding protection component if case-lack, and color bars calibration feature etc. (according to customer's requirements). We only need to change a few parts to pack a variety of specifications of products.

### **Product application:**

This machine is widely used in the single case automatic packing of all kinds of products in medicine, healthcare products, nutritious foods, foods, cosmetics, stationery, audio & video products such as the wrapping and packing of medicine boxes, playing cards, scratchpads, cassettes, cigarettes etc. It has the characteristics of antifogging, damp-proofing, anti-dusting, improving product additional value, improving product grade and improving decorative quality.

**Main Technical Parameters:**

Packaging speed	≤70 less than 70 cases/min
Packaging dimension(mm)	(L) 70-220mm (W) 30-140mm (H) 12-60mm
Equipment dimension(mm)	(L) 2180× (W) 840× (H) 1560mm
Main gas working pressure	0.4-0.5Mpa
Weight(about)	1200kg
Total power	4.85kw
Voltage	3N AC 380V 50HV
