

Shampoo Filler

Packry provide high quality and high-speed shampoo filling and capping machine which is suitable for filling all kinds of liquids with certain viscosity liquid. Packry's automatic inline emulsion filling and capping machines widely used in cosmetic industry.

1. The Auto Cosmetic Cleaning Filling and Capping Lotion, Liquid Filling Machine series of filling and capping machines are designed to dispense a wide variety of liquid and semi-liquid products.
2. Driven by accurate mechanical transmission, which can guarantee the quality of the products effectively. All the work stations, including filling, capping are equipped around one turnplate, thus both the working space and the operators needed can be greatly reduced.
3. The automatic and uninterrupted producing mode can help to guarantee the production volume you need. We choose good material and parts to assemble our machines.

Features:

- Automatic air cleaning- filling- inner cap inserting- capping, each part has two heads.
- Air cleaning system: cleaning dust and impurities.
- Filling system: Servo motor control, rotary valve filling. High filling accuracy, suitable filling high foam liquid, can self-suck when filling water type liquid.
- The hopper is with liquid level detection system. Simple operation and adjust
- Adjustable molds: suitable for different sizes of bottles
- Screw filling system: suitable for any of the screw caps. The cap contacting material is soft silicone, this material won't scrap cap
- Anyone can skillfully operate without training
- Movable with wheel

Specification:

- Capacity: 40-45 bottles per minute
- Material: Stainless steel 304&316
- Usage: filling for lotion, cream, shampoo, liquid soap, toner, conditioner, etc
- Filling volume: 15-250ml
- Function: automatic air cleaning, filling, collaring and screw capping
- Filling accuracy: $\pm 1\%$
- Filling nozzle: 2 pcs
- Air Pressure: 0.5MPA
