

## GZB-ZHJ Horizontal Pillow packing and Cartoning Production Line

### Purpose:

This horizontal pillow packing and cartoning production line for capsule and tablet is researched and manufactured to meet with GMP requirements for medicine production.

This production line takes GZB series horizontal pillow packing machine and the latest generation ZHJ series cartoning packing machine as its main body, PLC as control center. It can automatically achieve horizontal pillow packing, instruction folding, box sealed packing, as well as eliminating rejecter.

### Feature:

It is suitable for the full processing of A1-plastic, blisters to take film horizontal pillow packing and cartoning for capsules, tablets, candies, milk tablets, needles, etc. Ease of installation and operation.

### Main Technical Data:

model	GZB-260	GZB-450	GZB-450 limb
max.width of Packing material	260	450	450
max.External diameter of material roll(mm)	L50-150 W25-100 H2-30	L60-220 W30-180 H5-45	L80-240-180 H5-70
Length of the Conveyor	AC 380V three-phase and five-wire 50HZ total power 3.5 KW		
Standard Plate(mm)	80X57(can be manufactured as user's requirements)		
Air Pressure(MPa)	0.4-0.6		
Total power	380V/220V 50Hz 7kw		
Packing material	weight:250-300g/M2 specifications:max.size(130*80*50mm) PVC hard pieces(mm) 0.15-0.5*250 PTP aluminum foil(mm) 0.02-0.35*250		
Mould cooling	tap water or recycle water		
overall dimensions	7000*1000*1700(L*W*H)		
weight(T)	2.5
