

## *JF-QGB Manual Aerosol Filling Machine*

JF-QGB semi-automatic aerosol filling line, composed of semi-automatic double-headed filling machine, semi-automatic sealing machine, semi-automatic inflator (propellant filling machine (including booster pump)) three parts. The user can assemble the production line according to the process of aerosol product.

The line has been widely used in food, medicine, health, automotive, environmental protection, fire and daily chemicals and other aerosol products packaging, such as: mousse, hair gel, air fresheners, pesticides, disinfectants, Carburetor cleaning agent, polyurethane foam sealant and so on.

## Technical Parameter:

### Semi-automatic Double-Head Liquid Filling Machine Technical parameters

Model	JF-QGBF
Filling capacity	30-500ml(can be customized)
Filling accuracy	≤1%
Can height	70-330mm
Production capacity	800-1200cans/h

### Semi-automatic Sealing Machine Technical parameters

Model	JF-QGBS
Applicable Specifications	1" (25.4mm)
Can height	70-330mm
Production capacity	1200-1500 cans/h

### Semi-automatic Propellant Filling Machine Technical parameters

Model	JF-QGBC
Filling capacity	30-500ml(can be customized)
Filling accuracy	≤1%
Can height	70-330mm
Production capacity	800-1200 cans/h
