

GFZLQ-series Automatic Anti-corrosion Filling Machine

GFZLQ automatic antiseptic gravity filling machine can be used for filling various acidic or alkaline liquids such as toilet cleaner, kitchen oil remover, laundry detergent, hand sanitizer, etc.

The machine adopts positioning block conveying line, which can be applied to various bottle types.

This machine adopts PLC touch screen control, stable operation, easy maintenance. After a few parts are replaced and appropriate adjustments are made, glass bottles and plastic bottles of different heights and diameters can be filled with high versatility and wide range of applications.

Specification:

Mould	Machine Size(mm)	Capacity per hour	Apply to
GFZLQ-4	1600*1200*2400	At least 500 bph	Cleaning Agent Filling Machine
GFZLQ-6	1600*1200*2400	At least 720 bph	Cleaning Agent Filling Machine
GFZLQ-8	1800*1200*2400	At least 960 bph	Cleaning Agent Filling Machine
GFZLQ-10	2000*1200*2400	At least 1200 bph	Cleaning Agent Filling Machine
GFZLQ-12	2000*1200*2400	At least 1440 bph	Cleaning Agent Filling Machine
