

## *CMP Series PP Stretch Blow Molding Machine*

This PP bottle blow machine is dedicated to the production of pharmaceutical packaging and high temperature hot filling heat resistant bottles. Today the chemical resistance and suitability for steam sterilization of PP proves a winning combination. At CHIA MING Machinery, our second generation of PP stretch blow molding machine is available. The specialized design of these machines takes advantage of the characteristics of PP to ensure the highest quality.

### **Specifications:**

Model		CMP2	CMP4
Max. Capacity	ml	1000	1000
Max. body diameter	mm	90	90
Max. container height	mm	300	300
Max. Neck Diameter	mm.	38	38
Cavity	no.	2	4
