

Automatic Cold Glue Labeling Machine SBM-LM800CG

Automatic Cold Glue Labeling Machine is designed for the paper label, which is suitable for the Cans, Bottles and any kinds of cylindrical containers. Labels are pre-cut and have glue applied to them from the magazine. This machine is mainly used for the Food, Chemical, Cosmetics, Light industry, etc.

It is a modern machine integrating mechanism and electricity with good and reliable working property. The machine can stick label on all types of circular stuff with great adaptability. Can be used connect with assembly line.

Features

1. High labeling precision. The labels are attached to accurately.
2. Low glue consumption. The combination of steel glue roller and rubber coated gluing pallets together with the well-designed mechanism for adjusting the thickness of the glue film keep the consumption of glue to a minimum.
3. User-friendliness. The cold-glue labeler is easily accessible and operation from the central touch-screen is easy.
4. Time saving. Only short conversion times needed when changing containers and labels.
5. Cost saving. Compare to self-adhesive labels, paper labels make a low cost.
6. Flexibility for the future. The cold glue labeler can still be retrofitted or modified, even after many years of service. The machine can work with printer and code machine.

Technical Info

Model	SBM-LM800CG
Labeling Speed	30-75 pcs/min (Depending on label length and container diameter)
Height of Object	60-300mm
Diameter of Object	30-100mm
Height of Label	60-150mm
Length of Label	60-360mm
Accuracy of Labeling	±1mm
Power Supply	Three-phase 380v 50Hz 800W
Type of Glue	Soluble resin, Polyvinyl acetate emulsion
Dimension	(L)2371*(W)794*(H)1188mm
Machine Weight	Approx.160kg
