

BS-15/500/BC-II Automatic Tablet Counting Machine with 2 Counters

Being widely used for the filling and packaging of the tablets, pills, granules, hard capsules, soft capsules and irregular slices in the pharmaceutical, food and chemical industries, the automatic double-head tablet counting machine can carry out the operations of rearranging and feeding bottles, correct counting tablets by two heads and filling various granules with different shapes into bottles.

Main Features& Technical Data:

Item	BS-15/500 Frequency-conversion Full automatic tablet counting machine	BC-II Automatic Double-Head Tablet Counting Machine
Running condition	1.Stepless speed regulation of feet belt. 2.Three-step speed regulation of tablet counting disc and clutch, stepless speed regulation of converter. (Speed range of tablet counting disc: 0~10 r/min)	1.Fixed speed of bottle rearranging. 2. Fixed speed of feed belt. 3. 3-step speed regulation of tablet counting disc and clutch(evenly adjusted by tablet counting plate)
Counting condition	1.Angle of counting head can be adjusted so as to suit the counting and filling of materials with various shapes. 2. Mechanical vibrating frequency can be adjusted to ensure a correct counting.	
Tablet counting plate diameter (mm)	Φ467mm (made of Perspex); Φ476mm(made of laminate)	
Bottle specification (ml)	15~500ml	
Production capacity (pcs/min)	10~40 according to granule shape and quantity	12 bottles/min (divided 1) 12 bottles/min (divided 2) 12 bottles/min (divided 3)
Total Rating (Kw)	0.75	0.87
Outline Dimension (mm)	2400x1330x1420	1950x1330x1420
Total Weight (kg)	240	350
