

High Speed Servo Packaging Machine IV350/350S

High Speed hffs flow pack pillow packing machine is suitable for packing regular products that need high speed and high efficiency. Such as small candy, chocolate bar, single biscuit / cookies, soap bar, etc.

Main Performance And Structure Features:

1. Cross seal and middle seal are controlled by independent Panasonic servo motor. With simple mechanical structure, stable operation, and low noise.
2. High speed, high accuracy, the maximum speed can be up to 350 bags / min.
3. Human machine interface, convenient and smart parameter settings.
4. Automatic fault diagnosis function, fault displayed clearly.
5. Color tracking, digital input seal cutting position, make the seal cutting position more accuracy.
6. Double supporting paper structure, automatic film connecting device, simple film changing, quick and accuracy.
7. All controls can be implemented by software system, facilitate functional tuning and technical upgrading, and never fall behind.

Specification:

Model	IV350	IV350S
Film Width	Max.350mm	Max.350mm
Bag Length	120-320mm / 65-190mm	80-999mm
Bag Width	30-160mm	30-160mm
Products High	Max.45mm or 65mm	Max.45mm or 65mm
Film roll diameter	Max.320mm	Max.320mm
Packing Speed	50-350bag/min	50-350bag/min
Power	220V 50/60Hz 4.5KW	220V 50/60Hz 4.5KW
Machine Size(L*W*H)	4000*1100*1610mm	4000*1100*1610mm
Machine Weight	700kg	700kg
Remarks	Change the film no need to stop machine
