

Juice Stick Packing Machine CP240BY

This stick machine can automatic measuring, making bag, filling, sealing, cutting off, batching number and output counting, suitable for viscous material such as honey, chocolate paste, etc.

Basic characteristics:

PLC, self-diagnosis function, easy to operate.

According to film thickness (support 70-140mic), set temperature on the panel directly.

Adjust the stick length on control system directly, high sensitive trace sensor.

Heating and mixing system, heating temperature up to 100°C, more suitable for viscous material.

Whole machine material is stainless steel 304, in line with international food and medicine industry.

Driving type is Electric+pneumatic, more beautiful sealing appearance.

Parameters:

- Capacity(bags/min): 30-60
- Range of measurement: 10-100ml/0.35oz-3.5oz
- Bag type: center sealing/stick
- Packaging Material: 70-130mic laminated film such as PE + paper +pet/ PE + PET/ AL Foil / PE + Nylon + PET / Filter paper ect.
- Voltage power: 380v/50Hz 220V/50-60Hz 1.5KW
- Net Weight: 220kg/485lb
- Overall Dimention(L*W*H): 712*680*1850mm/28"*26.77"*72.83"
- Driven Type: Pneumatic+electric or electric
- Air Consumption: 0.4m³/min 0.6-0.8mpa
- Optional sealing and cutting type: straight line sealing, diamond sealing/mirco-diamond sealing, zigzag cutting, straight line cutting (flat cutting), round corner cutting, etc.
