

## *Auto Cup Filling and Sealing Machine YFS-6*

YFS-6 is a filler/sealer produced and designed for medium/large productions. It is perfect for high precision packaging, sealing and checking up to 4000 pieces per hour.

Cups are placed automatically denested, into the carriers. At each index containers can be filled, sealed and automatically discharged. Film is cut in between each container, leaving absolutely no waste of film. Further savings include reduced labor costs and downtime by eliminating the need to handle and discard excess film.

### **Application:**

Yoghurt, dressings, soups, ready-to-eat sauces, jams, liquid and dense/paste-like products in general, even at different temperatures.

### **Technical Parameters:**

#### Model: YFS-6

- Maximum Cup Diameter: 95mm
- Film Type: Roll Film or Pre-Lid
- Working pressure: 0.6-0.7Mpa
- Max Speed: 6000 pcs/Hour
- Max Cup Diameter: 95mm
- Filling Range: 1-20ml, 20-100ml, 50-250ml, 100-500ml, 500ml-1000ml
- Max Cup Diameter: 95mm
- Machine Size: 2900X1300X1850mm
- Voltage: 220V/100V/380V 1.8Kw
- Machine Weight: 1000 Kg
