

## Vertical Bag Liquid Packing Machine RS-420Y

It is suitable for packing liquid, cream, shampoo, colloidal sticky materials or organic fertilizer etc.

### Features:

- Machine with advanced technology, beautiful appearance, reasonable structure, stable performance, precise operation, efficient and durable, easy to operate, energy saving and other diversified quality characteristics.
- Set of measuring, bag making, filling, sealing, cutting, testing, coding, counting, transport and other processes in a fully automatic multi-functional packaging machine.
- Machine manually using man-machine interface, automatic detection and alarm system program, application imports PLC, cylinder, optical, touch screen, temperature controller, frequency converter, relays, servo motor, high quality power supply circuit.

### Technical Parameters:

Model	RS-420Y
Packing speed	10-70bag/min
Bag-making size	(L)80-300mm (W)80-200mm
Filling range	5-1000 ml
Packing materials	OPP/CPP PET/PE PET-AL/PE, etc
Film width	180-420mm
Film thickness	0.04-0.08mm
Air consumption	0.36m <sup>3</sup> /min 0.6Mpa
Power supply	AC220V/380V 50/60Hz 3.5kw
Machine dimensions	1750*1050*2600mm
Machine weight	750kg
