

## *SKP-1 Single Lane K Cup Coffee Capsule Filling Machine*

### **Function**

Standard Function: k-cup coffee capsule dropping, Omron detection (no cup no filling), servo motor filling, Clean powder, put pre-cut lids (rolled film) copper sealing head out put

Optional Function: UV light, Anti-static device, Remote control, flavor adding system, auger feeding system, bag packing machine, box filling and folding machine.

## Technical Parameters:

### Machine Technical Parameters

|                     |  |
|---------------------|--|
| Machine Parts       | All the product contact parts are stainless steel AISI 304. The machine is constructed of stainless steel, anodized aluminum and plastic |
| Certification       | CE, FDA, CSA, ISO 9001,SGS   |
| Product Material    | Ground coffee,milk,tea powder  |
| Sealing Style       | Die-cutting aluminum foil  |
| Production Capacity | 15-30 capsules per minute  |
| Coffee Feeding      | Servo driven auger filler  |
| Filling Weight      | 10-15g   |
| Dosage Accuracy     | ±0.15g   |
| Power               | 1 phase 220V 50/60HZ 1.5KW   |
| Air Pressure        | 0.6Mpa-0.8Mpa  |
| Air Consumption     | 0.6m <sup>3</sup> / minute   |
| Weight              | 650Kg  |
| Dimension           | 2335mmX670mmX2630mm  |
| Drawing             | Attached below   |
