

Fully Automatic Carton Packing Machine With PLC Touch Screen Control

The packing machine is a strong compatibility machine, which suitable for various specifications cartons.

Description:

1. It adopts PLC touch screen control, equipped with bottle lacking alarm device, no bottle no packing safety protection.
2. These assembly line greatly convenient to operation, management, reduce production personnel and the intensity of labor, is essential for automated mass production equipment.
3. According to the packing requirements, it can automatically arrange the products.
4. Varies applicability and apply to a variety of products packing.
5. Especially suitable for packaging assembly line, convenient to move.
6. Computer program control, simple operation, stable action.
7. It used in bottles, boxes bags, barrels series

Technical Parameters:

Dimensions(mm)	L200-450 W150-400 H150-350mm
Packing Speed	10-12 packs/minute
Overall Dimension	2200×1880×3000mm
Shrink film material	PE PVC POF
Voltage	220V/380V 50/60HZ
Air Source	5-6kg/cm ³
Automatic Grade	Fully Automatic
After-sale Service Provided	Engineers available to service machinery overseas
