

Vertical Bucket Elevator

Rainbow bucket elevators are mainly used for the vertical transportation of granular materials just like peanuts, sweets, plum, rice, pet foods, potato ect. They are designed with stainless steel sanitary construction, durable configuration, high lifting altitude, large delivery capacity.

Machine Features:

- *Stainless steel sanitary construction , 90-degree
- *Food grade white buckets (flat or dimpled)
- *Stainless steel contact parts
- *Safety tool-less removal of buckets
- *Automatic stop & start sensor control with filling from hopper or to scale
- *Easy to operate & easy to clean
- *Caster for easy positioning
- *Wide range of options including indexing, integral feeders , covers , multiple discharge locations ect.

Technical Parameters:

*Bucket type :	food grade plastic of polypropylene(PP)
*Frame Material :	stainless steel 304 and mild steel for option
*Discharge height :	normally 13'
*Bucket size :	2liter
*Power supply :	0.75KW ,220V , 60HZ
*Capacity :	7m3/hour
