FKP-901 Automatic Fruits and Vegetable Weighing Printing Labeling Machine

FKP-901 weight labeling machine can be directly installed in the assembly line or other supporting machinery and equipment, and is widely used in food, electronics, printing, medicine, daily chemical and other industries. It can print and label the products that flow in real time online, and unmanned printing and labeling production; Print content: text, numbers, letters, graphics, bar codes, two-dimensional codes, etc. weight labeling machine Suitable for fruits, vegetables, boxed meat real-time printing weighing labeling. Support custom labeling machine according to the product.

Technical Parameters:

- Weighing range: 3g~5000g
- Weighing accuracy within: ±2-3g
- Table size buffer section: long 700mm; 300 mm wide;
- Weighing section: 700mm long; 300 mm wide;
- Size of the product to be tested: 500mm long * 280mm wide
- Labeling accuracy: ±3mm without product label error;
- Labeling speed: 20 / min
- Applicable product size: with the weighing machine out of the product
- Applicable label size: length * width: 120*100mm
- Operating temperature from: 0°C to 40°C
- The part of the scale is made of SUS304 stainless steel
- Applicable power supply: 800W/220V/ 50Hz;
- Weight of the machine: about 100Kg.
