

Liquid Paste Rotary Packing Machine BF6-200-L

This set of equipment is made up of bag feeding packaging machine and paste filling machine. It is mainly used for automatic measurement packaging of liquid paste materials such as washing liquid and fruit juice.

Main performance features:

1. Convenient operation: PLC control and man-machine interface operation system are adopted to make the operation intuitive and convenient;
2. Convenient adjustment: the variety change is completed within 10 minutes;
3. Suitable for different types of bags;
4. Perfect prevention system, ensure the rate of finished products, do not waste bags and materials;
5. Stainless steel materials are used for the packaging parts of the machine to ensure the health and safety of the materials;
6. The machine adopts automatic detection device to realize the automation of packaging process, reduce the labor intensity of workers and save labor.
7. Some of them are imported engineering plastics, which do not need to be refueled to reduce the pollution of materials;
8. Adopt oil-free vacuum pump to avoid polluting the production environment.

Technical parameter:

Modle	BF6-200-L
Package type	Flat bag, three side seal, four side seal, independent bag, etc
Material	Laminated film . PP. PE
Package size	W:100-210mm L:150-300mm
Volume	5-1500g
Speed	10-40 bag/min
Power supply	3.2KW,AC380V,50HZ
Machine size	3500*1800*1660mm
Weight	1300kg
