

## Automatic Carbonated Drink Filling Machine CGF32-32-8

DCGF series PET bottle washing bottle / filling / sealing three in one machine is an advanced machine developed independently for our soft drinking filling based on the international advanced filling technology and technology. The machine adopts a bottle mouth delivery mode and only needs to change very little change parts. It can be applied to a variety of bottle type and smooth transportation. The filling method is high pressure filling. The unique filling technology not only improves the filling speed and filling precision, but also avoids the production of bubbles during the filling process. The hygienic cycle system ensures the temperature of the product when the product is filled and provides a reliable guarantee for the quality of the product.

### Application:

Function: washing-filling-capping system	Control: PLC
Suitable: PET bottle with screw cap	Bottle Size: 200-2000 ml
Filling System: Isobaric Filling	Capacity: 10,000-12000 BPH For 250-500ml
Application: sparkling water, soft drinking water, soda water and ect .	

**Technical parameters:**

<b>Model</b>	<b>CGF32-32-8</b>
Capacity :( for 250-500ml )	10000-12000 BPH
Suitable bottle shapes	PET Circular or square
Bottle diameter	50-120 MM
Bottle Height	150-320 MM
Compressor air	0.3-0.7MPA
Washing Medium	Aseptic Water
Washing pressure	0.06-0.2mpa
Application	sparkling water/soft drinking water/soda water
Power	9.5kw
Overall Dimensions	4200*2100*2250 mm
Weight	6500kgs
