

## *Automatic Stick Granule Packing Machine*

The Automatic Stick Granule Packing Machine is suitable for packaging non-sticky, bulk or granular materials, such as medical pills, food, plant seeds, washing powder, coffee, sugar, desiccant and so on.

The Automatic Stick Granule Packing Machine can be used for bag making, metering filling, sealing, cutting, counting, and ironing.

The machine's packaging materials include several heat seal laminates, such as PET / electroplating AL / PE, PET / PE, PAPER / PE, NYLON and so on.

### **Features:**

1. The Automatic Stick Granule Packing Machine is made of stainless steel and conforms to GMP standards. Internationally accepted.
2. The Automatic Stick Granule Packing Machine is equipped with anti-fouling and dustproof devices. Guarantee the cleanliness of the product.
3. The Automatic Stick Granule Packing Machine can automatically adjust the size and filling range of the bag. Simplifies the trouble of manual operation.
4. The photocell controller is easy to operate.
5. The horizontal seal is made of high temperature resistant bearings to ensure continuous operation of the machine without regular oiling.
6. The operating facilities are controlled by Intel Computers in the United States and all functions are displayed on a digital screen.

**Technical Parameter:**

Packing speed (Bag/Min)	30-70
Making bag size	L:30-150mm
Maximum outer diameter of reel paper (mm)	350-450
Calculate range (ml)	5-200ml
The Thickness Of The Packing Film (mm)	0.03-0.10
Working Voltage	220V
The Shape Of The Bag Making	3/4 sides seal
Power	1.5KW
Net weight	290KG
Outside Dimension (mm)	650×900×1550
