

HL-DXDF-280/350 Automatic Powder Packing Machine

This machine is equipped with a dual-CPU microcomputer control system, a 5-inch LCD display in Chinese or English, a humanized operation interface, automatic cursor detection and tracking, and simpler operation. Equipped with a high-precision stepping motor to ensure the accuracy of the cutting position of each packaging bag.

Performance:

Adopt the straight screw to advance the feeding method to prevent the packaging weight from being directly adjusted during the packaging process. The adjustment process does not need to be stopped, which effectively improves work efficiency. It can be equipped with a coding machine, a flailing knife, a fillet, aeration, exhaust and dust collection devices.

Uses: This machine is suitable for automatic measurement and packaging of powders such as milk powder, coffee, soy milk powder, sesame paste, lotus root powder, dyeing powder, seasoning powder, and medicinal powder.

Technical Parameter

Model	HL-DXDF-280	HL-DXDF-350
Measurement range	1-50g	100g-500g
Filling speed	0-50Times/min	0-40Times/min
Filling way	Inclined push spiral	Horizontal sliding screw
Bag making size	L:40-160 W:40-120mm	L:80-250 W:60-150mm
Packing style	Three edges, four edges, back seals	Back seal
Power supply	220v 50HZ 1.1KW	220v 50HZ 2.3KW
Machine size	730*1000*1700	1000*950*1800
