

Plastic Premade Bag Packing Machines D-200WD

Feature:

1. Automatically check pouch open status, it will not fill and seal when pouch is not opened fully. It avoids the wasting of pouch and raw material and save cost.
2. Machine working speed can be adjusted continuously with frequency converter
3. SIEMENS PLC adopted, the control system is easy to operated with friendly HMI interface.
4. Machine will alarm when the air pressure is abnormal and stop working with overload protect and safety device.
5. Machine can work with dual-fill, filling with two types of material, such as solid and liquid, liquid and liquid.
6. Machine can work with pouch width range from 70-150mm, 100-200mm, 200-300mm by adjusting the width of clips.
7. Adopting advanced bearing, where no need to add oil and less pollution for product.
8. All the product and pouch contact parts are made with stainless steel or the material according with the food hygienic requirements, guarantee hygiene and security of the food.
9. Rotary packing machine can work with different filler to pack solid, powder and liquid.
10. With pre-made pouch, the pattern and sealing on the pouch is perfect. The finished product looks advanced.
11. Machine can work with complex film, PE, PP material premade pouch and paper bag

Technical Parameters:

Model No.	D-200WD
Product Name	Automatic Premade Bag Multi-Function Packaging Machines
Function	Bag-feeding, Filling, Wrapping, Sealing
Voltage	380V 50/60hz
Packing Speed	25-60 bags /mins
Packing Bag Size	L: 100-350mm
	W : 60-200mm
Applicable Industry	Food, Drink,Commodity, Medical, Chemical etc
Suitable Bag Type	5258*3610*3655mm
Dimension (L*W*H)	#304-Stainless steel
Gross Weight	1300KG
