

DDX Automatic Packing Production Line

The automatic packing production line is mainly composed of pusher parts, tray parts, conveying parts, frame parts, pneumatic parts and direct parts, which can complete automatic feeding of rolls, automatic arrangement of rolls, automatic loading of rolls.

The equipment has the advantages of safety, reliability, easy maintenance and large capacity.

Specification:

- Applicable materials: large diameter colloidal emulsion explosives
- Production capacity: 4.3-8.6 tons / hour
- Medicine roll arrangement (row x column): customized according to user needs
- Pharmacy size range: $\phi 50 \sim \phi 130$ (length 400-600) emulsion plastic film
- 1 person operation
