

SB-F200 Powder Filling Packaging Machine

Be suited for measuring and filling of powder or granulated materials, with volume over 100ml, such as flour, rice, granulated sugar, infusion, granulated drunkest. Controlled by microcomputer with measure parameters adjusted by code switches. Precise measuring, convenient adjusting and steady running. Filling with manually-controlled footboard as well as with automatic filling line.

Purpose:

Powder kind: Milk powder, bean powder, condiment, humid pesticide powder, etc.

Technical Parameter:

- Packing speed: 20~50 Bag/min (Depend on the material and specifications)
- Filling capacity: 1~200 ml
- Consumption power: Approx. 0.5 kw / AC220V
- Measuring Method: Auger
- Dimensions: (L)625mm×(W)625mm×(H)1558mm
- Weight: Approx. 90 kg
