

Light Sauce Filling Machine

Automatic Piston filling machine works on High-Viscous volumetric piston principle. The machine is manufactured using stainless steel so it has compact design and it is versatile in nature. To fill the thick liquid into container, it is placed under the nozzle at center of the machine. The semi-automatic Piston filling machines uses the method of volumetric filling to fill low or high viscosity liquid. Light sauce filling machine is used to fill cream, jam, cosmetics and light sauce. The speed of filling can be differing based on the liquid viscosity and the characteristics of the filling product. Our machines are sturdy, durable for long service with low maintenance and smooth operation.

Features

- GMP Model ± 1 % Filling accuracy on single dose.
- Jacketed Hopper with Low RPM Stirrer.
- No Container No filling system
- Rigid vibration free construction for trouble free performance.S.S. Elegantly matt finished body.
- Elegant and easy control panel for total control on operation.
- Minimum change overtime, from one size to another container or fill size.
- Pneumatic bottle stopping arrangement.
- In built Air filter & air Lubricating System
- Variable Speed Controller conveyor belt

Specification

- Honey
- Shampoo
- Cosmetic Cream
- Gel
- Toothpaste
- Ointment
- Paint

BRAND NAME	BHAGWATI
Model Number	SB FILL Series
Type	Filling Machine
Packaging Material	edible oil, paste, jam, sauce
Automatic Grade	Automatic
Power	according to different model
Application	Food
Condition	New
Packaging Type	Bottles
Driven Type	Electric / mechanical / pneumatic
Filling liquid	sauce, jam, paste, edible oil etc. viscosity liquid
Bottle material	PET bottle / HDPE/ Glass
Cap material	plastic screw cap / ROPP / Lug / Press
Bottle volume	250ml – 2000ml
Filling valve	piston filling
Production capacity	5000 bph – 20000 bph
Machine material	SUS (according to your requirement)
