

## *Fully Automatic Aluminum Cap Screwing Machine CM-ACSM*

### **Auto- Linear Capping Machine (screw type)**

#### *Principle and characteristics:*

- Automatic capping machine is mainly suitable for different material specifications and different specifications of the cover, spin (rolling) cover. Suitable for screw cover, anti theft cover, child proof cover, press in cover, etc.. Preparation of constant torque capping head, the pressure can be easily adjusted. Compact and reasonable structure, can be easily linked with other equipment into line, dust-proof cover can be purchased
- Functions Applicable to all kinds of cosmetics, medicine, veterinary drugs, pesticides, lubricating oil industry capping machine equipment.

### *Machine advantages:*

- Straight-line design, composed of convenient and beautiful lines.
- Host speed using imported inverter, steeples speed regulation.
- The strong electromagnetic left-hand cover torque converter, completely solve the traditional mechanical friction plate in the rotary cover spurts ills. This machine can be designed according to the special requirements of customers.

### **Automatic Linear Duckbill Capping Machine**

#### *Introduction:*

Linear duckbill Capping machine suitable for different size of caps and bottles, screw power and rotation speed of screw capping machine is adjustable. It is widely apply to pharmaceutical, chemical, food, beverage, grease and pesticide industry

#### *Features:*

- With features like ease of operation, highly productive and competitive price etc.
- This machine can be operated alone or coupled with filling machine, make the formation of filling line possible.

### **Technical Parameters:**

<b>Name</b>	<b>Auto- Linear Capping Machine</b>
Power	356W
Production speed	20-25pcs/min
Air pressure	0.6-0.8mpa
required air compressor	3kw 100L
Bottle diameter	35-110mm H:150-300mm
Machine weight	268kg
Machine size	2000*1400*1400mm
