

ULFLB-1120-03 Vertical Square Round Bottle Labeling Machine

The label strip from the label roll holder is spread around several guiding rollers, through the dispenser and fixed on the base paper recycle roller lastly. Bottles are fed via the spacing wheel. When the sensor detects the coming bottle, it will signal the label dispenser to stick out a piece of label, which is stripped off by the passing bottle. Then the label will be pressed closely against the bottle surface by the label wrapping device.

PERFORMANCE

The counter ULFLB-1120-03 is a reliable, high performance machine, designed in conformance with current and proposed cGMPs. Having a small footprint, they are effective in maintaining the integrity of a clean room environment. Up to 50 settings memory for various bottle-size labeling tasks; compact structure, reliable performance and easy adjustment.

Technical Parameters

Model	ULFLB-1120-03
Max. output	200 bpm
Bottle size	φ16~φ90mm
Max. label width	110mm (180mm in option)
Labeling accuracy	±0.5mm,
Power supply	AC220V 50/60HZ
Wattage	0.88KW
Air pressure	0.5~0.7 Mpa
Air consumption	30L/min, clean air
Measurement(L×W ×H)	Approx. 3000mm×1050mm×1214mm
Conveyor height	870±30mm
Weight	Approx. 200kg
