

NFJ-150 Capsule Polisher

NFJ-150 is a kind of capsule polished equipment with sorting function, it is not only used in capsule polishing and static eliminating, but also sorting the qualified products from defected products automatically, it is suitable for all kinds of capsule. No need to replace its mould.

Performance:

- The whole machine adopts stainless steel to be made, conforming to the requirement of GMP.
- The sorting brush adopts filleting connection with fast speed, convenience of dismantling, cleaning thoroughly.
- The rotation speed of motor is controlled by inverter, it can bear great starting pressure.
- Its socket is equipped with roller with flexible operation and high efficiency as well high purity of polishing. The defected products can be separated completely.

Technical Parameters

Production efficiency	Max. 70000 capsules/min
Application range	Various capsules
Power	220V 50/60Hz
Weight	45kg
Total power	0.18kw
Vacuum dust-intake	2.7m ³ /min
Compressed air	30pa
Dimension(L*W*H)	900*600*1100mm
Accessory equipment	dust collector(1pc)
