

BD-27 Pillow-Bag Packaging Machine

BD-27 Pillow-Bag Packaging Machine. Liquid Packing Machine. The process of measuring, bag-making, filling, sealing, printing and cutting can be done automatically. The packaging machine can pack many kinds of material such as grain, powder, liquid and tablet. Purpose: Liquid and sauce kind: Syrup, honey, jam, ketchup, shampoo, liquid pesticide. Adopts CPU to control each function states, and setup the man-machine conversation interface. The Double channel temperature of the horizontal and vertical is controlled by intelligent temperature controlling device. Intelligent photo cell orientation, transform discretionarily between the light/shade. Strongly anti-jamming, when two bags can't catch up with the upper mark the machine will stop and give an alarm. The packaging speed can be adjusted continuously within specified range. Orientation open mouth and stop. The bag-making has high precision. Easily Operation and maintain. Measurement adopts adjustable cup method, which is accorded with the national measurement standard. Optional devices: It is choice to be stirring mechanism, hackle cutters, point line cutters, easy-tearing cutters and exhaust. It is choice to be both heat-sealing mechanism and net or even heat-sealing channel veins. Liquid packaging machine can choose antiseptis measuring mechanism (Aim at pesticide industry). The machine that has special bag-size or measuring requirement can be devised and produced specially.

Technical Parameters:

Model	BD-27
Production Capacity	40-60 bag/min (depend on the material and specifications)
Pouch Length	50-140 mm
Pouch Width	50-100 mm
Seal Style	Pillow
Filling Volume	10-50 ml
Measuring Method	Piston Pump
Power	380V,50Hz,1.1Kw
Packing Size	800*600*1700 mm
Packing Weight	250 Kg
