

LTPK LT-50D Semi Automatic Round Bottle Labeling Machine With Date Coder

Advantage:

1. The printing area can be changed by adjusting the date printer position, that means you can print the date on top left or right corner or any position of the label.
2. With temperature control box, can print number or date clearly and adjust temperature easily. Easy to operate.
3. With electric eye, can position accurately, improve labeling accuracy.
4. With larger power motor, works stably and safely
5. Stainless steel machine body, high quality roller, these all make the machine works better and can improve working efficiency.

Technical Parameters

- Product model: LT-50D
- Product diameter: Diameter 20-130mm
- Input power: 220V/110V
- Labeling speed: 20- 40 times/min
- Minimum label size: W30xL30mm
- Maximum label size: W130xL300mm
- Label roll inner diameter: 76mm
- Label roll outer diameter: 200mm
