

## ***FXC5050XG Small Carton Automatic Sealing Machine***

### **Product Description**

1. FXC5050XG carton sealing machine is mainly used for carton sealing and packaging. It can be used alone or as a necessary part of the production line. On the basis of FXC5050X, this carton sealing machine adds the function of lengthening tape, and a 7cm tape is reserved on the side of the box to make the packaging stronger.
2. This machine is widely used in electrical appliances, household, textile, food, department store, medicine, chemical and other industries.
3. This model can be installed with a printer.
4. The carton is conveyed by conveyor belts on both sides.
5. Manually adjust the height and width of the carton according to the size of the carton, then put the carton on the workbench, and at the same time the carton is automatically conveyed through and sealed with tape.
6. This machine is specially designed for small cartons
7. 7cm of tape is reserved on the side of the box
