

## *MT-60C Semi-automatic Flat Labeling Machine with Coding*

Imported high-precision intelligent electric eye and high-reliability computer chip program controller (PLC) are used to control the labeling. The air pressure is used to adsorb the self-adhesive label on the label head, and the labeling head cylinder is used for labeling.

### **Application:**

1. Flat labeling of various objects.
2. Labeling on the flat surface of square bottles of cosmetics and medicines.
3. Labels or anti-counterfeit labels on the flat surface of various boxes.
4. Labeling on the surface of LCD screens and electronic components is widely used in flat labeling films in cosmetics, daily chemicals, electronics, food, medicine and other industries.
3. Product advantages:
  1. The efficiency is as high as 60 times per minute.
  2. The labeling head is adjustable up and down, front and rear, to meet the labeling needs of different workpieces.
  3. Good labeling effect, no bubbles, no wrinkles, high grade, and increase product competitiveness.
  4. Electronic components such as brand PLC and sensors are selected, and the performance is extremely stable.
  5. It can be flexibly equipped with production line for online labeling, or stand-alone labeling.
  6. Modular design, convenient maintenance and low maintenance cost.

**Technical Parameter:**

Model	MT-60/MT-60C
Voltage	AC220V/50hz
Power	200W
Labeling speed	20-40 pcs/min
Precision	±1
Label roll diameter	≤φ200mm
Inner diameter of roll	φ75
Max Label size	W20-110 L20-60mm can customized
Machine size	300*200*400mm
Machine weight	20kg
