

ZL Series Rotary Granulator

ZL rotary granulator can press the mixed substances into the demanded particles. It is especially suitable for material of higher viscosity. This granulating machine is widely used in pharmacy, food, chemical industry and solid beverage. Our company can supply ZL250 and ZL300 rotary granulators. They are exported to more than 30 countries around the world.

Features

1. The part where this granulating machine contacts with the material is made of stainless steel.
2. It has reasonable structure and high granulation shaping rate.
3. ZL rotary granulator sends out materials automatically so as to avoid the damage caused by manual sending.
4. It is quite suitable for continuous productive process.

Parameters

Model	ZL250 (A)	ZL300
Trough Capacity (L)	250	300
Granule Diameter (mm)	2-2.2 (Customized)	1.8-2.5 (Customized)
Overall Size (mm)	700 × 540 × 1300	880 × 640 × 1300
Motor Power (kW)	3	3
Weight (kg)	350	400
Capacity (kg/h)	100-200	140-400
