

NF-80 Ointment Filling and Sealing Machine

It's suitable for filling, sealing and date printing the products adopting tube packing of daily chemistry, pharmacy, food, chemistry, industry, etc.

The machine was characterized by mechanism structure, stable operation, high speed, high efficiency, low noise, simple structure, convenient operation and maintenance and less fault.

Automatically insert the tube and position, PLC control system, heat the inner tube with hot air, accurate position. Can adjust and show on touch screen the filling volume automatically. It is an ideal machine for sealing plastic tube. It has attractive appearance and reliability.

Technical Parameters

Operation Speed	75/min/max
Filling Range	Plastic tube 3-250ml, Alu tube 5-180ml
Suitable Tube Length	210mm
Suitable Tube Diameter	13-60mm (above 50 should make special 50)
Power Supply	50Hz/380V 3P
Main Motor	2.2KW
Hot Air Generator	3KW
Water Chiller	1.5KW
Case Body Material	304
Whole Machine (L×W×H)	2.5X1.2X2.4M
Weight	(about) 1200Kg
