

HFB-60 Automatic High-speed Strapping Machine

HCP-5 automatic packing machine is a new product developed by our company in combination with foreign technology. It can be connected to packing, three-dimensional, heat shrinking and other machines, and the back end can be directly connected to packing and palletizing , to achieve a complete rear package production line. The equipment adopts all-aluminum high-end advanced design, adopts imported electrical components, PLC, man-machine interface operation, and has functions such as automatic unpacking, automatic packing, and automatic sealing, which makes the operation process of the equipment more stable and convenient. Industry can use, the equipment meets GMP standards.

Technical parameters:

Packing speed	30-60 packs/min, (depending on box size and palletizing method)
Packing size	Maximum 250x250x300mm, minimum 50x60x90mm
Package dimensions	PE film (width 30-80mm, thickness 30-80mm)
power supply	220V/50HZ
total power	3KW
air pressure	0.6-0.8MPa
weight	980KG
Delivery size	1800x296x840mm connection front-end cartoning machine
Host size	1900x1000x1850mm
