

## *UT1BFG6 Semi Automatic Vacuum Tin Can Closing Machine for Canned Tabacoo*

Semi Automatic Vacuum Tin Can Closing Machine for Canned Tabacoo is absolutely the ideal equipment for small and medium-sized food enterprises and packaging enterprises. It is suitable for sealing all kinds of round cans.

The machine has advanced design, reasonable structure and easy operation, which is the necessary and ideal packaging equipment for food, medicine, tea and chemical industries.

### **Features**

- The latest generation design, the cans will not rotate during the sealing process, only the sealing rollers rotate to complete the sealing, reliable and safe, especially suitable for fragile material and liquid packaging.
- The sealing rollers and chuck head are made of 440C stainless steel, which is extremely hard and not easy to rust, with a service life of more than 6 million cans or 5 years.
- In the case of vacuum and nitrogen filling, the residual oxygen content can reach below 3%.
- Semi Automatic Vacuum Tin Can Closing Machine for Canned Tabacoo can complete the functions of vacuuming, nitrogen filling and sealing in the vacuum chamber at one go.
- PLC control system and touch screen operating, simple and easy to use.
- Extremely low vacuum degree can be achieved with high-pressure vacuum pump inside the machine.
- The machine and main parts are made of 304 SS and up to food, medicine and health industry standard. Suitable for foodstuff, medical, chemical, and etc. industries.
- All electrical appliances and pneumatic components are manufactured by well-known manufacturers at home and abroad, reliable and stable quality.

## Product Parameter

Function	Vacuum nitrogen filling tin canning, can seaming, can sealing
Sealing rollers	Rollers 1 pair (1st seam roll + 2nd seam roll)
Sealing Speed	5-6 cans/min
Sealing Height	40-190mm (adjustable)
Sealing Diameter	50-153mm
Voltage	220V,50/60Hz
Power	2KW
Weight	200KG
Dimension	750*1030*1700mm (L*W*H)
Air source	0.6-0.8 MPa
