

CHE-6020HG Automatic Side Sealing Shrink Wrapper | High Speed

The automatic side sealer is the perfect solution to your packaging needs. Specially designed to pack large size goods such as photo frame, self-assembling furniture..etc.. Servo motor is precise and its sealing mechanism is adaptable to different types of shrink films and able to support stable and consistent packing operation. The human machine interface of touch panel provides easy access to control and setup of the system including quick change over to different settings.

Features

- HMI provides easy access to all settings
- No product length limit
- Continuous motion side seal, packing speed can reach to 25~32 pcs/minutes depends on product length
- Memory capacity for 10 job settings
- Digital display of temperature control.
- Safety cover to assure the operator safety
- Applicable for POF shrink films, thickness 0.012-0.03mm
- Feeding and sealing automatically to save the labor cost.
- PLC controlled-easy to alter program
- Photoelectric cell in feed system provides both horizontal and vertical choices to suit various product sizes
- Sealing system controlled by servo motor ensures accurate position and perfect sealing.

Specifications

Model	CHE-6020HG
Power Supply	1φ,220V, 50/60HZ
Power Consumer	3 KW
Packing length	L80 ~ unlimited
Max. packing width	60~300mm
Max. packing height	180mm
Sealing length	520mm
Conveyor speed	10-30 M/min
Packing speed	25~32 pcs/mins (depends on product length)
Machine size	L1630xW1150xH1590mm
